

# The VCLCo Lima Shay

The Shay locomotive was the most widely used geared steam locomotive. Lima built locomotives to the patents of Ephraim Shay, who has been credited with the popularization of the concept of a geared steam locomotive.

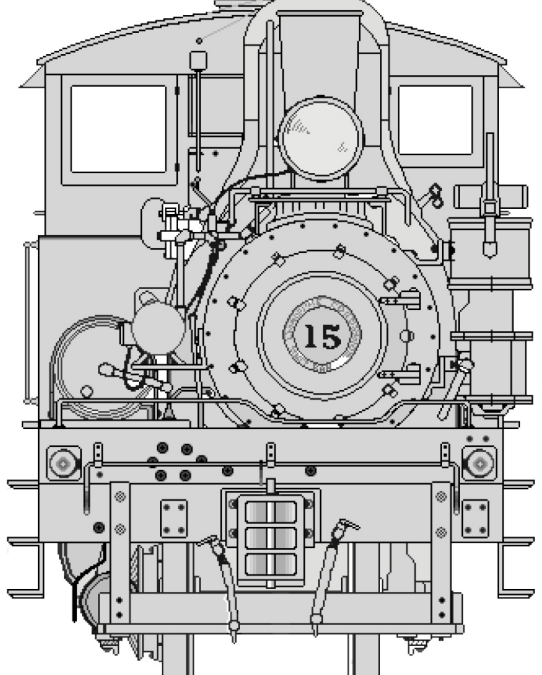

The VCLCo and subsequent sawmill companies had three different Shays over their existence:

1. #3, 36 ton, 2-truck Lima Shay Locomotive steam engine, Lima #2939.
2. #2, 42 ton, 2-truck Lima Shay Locomotive steam engine, Lima #2035.
3. #1, 50 ton, 2-truck Lima Shay Locomotive steam engine, Lima #2146.

Note: No spark arrestor.

## SHAY

What else is unique about a Shay looking at the front?

Engine boiler is offset from center of engine.

## LOCOMOTIVES
